EDUCATION & CERTIFICATIONS

University of Washington
Certified Kubernetes Administrator

Seattle, WA | June 2020
Linux Foundation | Feb 2025

WORK EXPERIENCE

ECOLOAI | DEVOPS ENGINEER

Remote | Jul 2025 – Present

- **Kubernetes Infrastructure**- Deployed and operated production applications on **bare-metal Kubernetes**, managing frontend/backend services, **MongoDB**, **Redis**, and **MinIO** stateful workloads, NGINX ingress/routing, and **Helm/ArgoCD** deployments across production and staging.
- **GPU Container Orchestration & AI Inference**- Built GPU-enabled Docker Compose stacks with **PyTorch/CUDA** images and **NVIDIA Container Toolkit**; troubleshoot driver/CUDA/PyTorch compatibility and aggregated models/assets from **Hugging Face**, GitHub, and external repositories for **ComfyUI** image/video inference.
- **Kubernetes Observability**- Built a production **Prometheus/Grafana/Loki** stack; deployed **Alloy DaemonSets** for dynamic Kubernetes log collection, instrumented Redis, MongoDB, and MinIO metrics, and engineered Grafana dashboards and **Telegram alerting** for application/middleware health.
- **Custom Monitoring Systems**- Engineered Python **systemd** monitoring for production services that track **MongoDB** latency, **RabbitMQ** redeliveries, and **ComfyUI** consumer pipelines- alerting via **Telegram**.

CASTLE HILL GAMING | DEVOPS ENGINEER

Charlottesville, VA | 2023–2024

- **Automated QA & Internal Tooling**- Built a centralized test repo with RESTful endpoint and Git webhooks for CI test discovery; added Jira-integrated QA submission form and hardware lab checkout system.
- **Docker Initiative & CI/CD**- Containerized legacy test environments into versioned Docker images on ECR; migrated CI from GitHub to GitLab on TeamCity with scalable EC2 build agents.
- **Grafana & Prometheus**- Deployed Prometheus + Grafana on EC2 with custom exporters and scrape configs for live metrics, dashboards, and alerting.
- **Cloud Infrastructure Optimization**- Used Terraform to decommission unused resources and consolidate S3, cutting AWS costs by over 60%; built a Lambda pipeline ingesting ~1TB/day to S3.

ETHFINITY STUDIOS | SOFTWARE, DEVOPS ENGINEER

Seattle, WA | 2021–2023

- Provisioned AWS infra with Terraform (EC2, VPCs, SGs); containerized backend services with Docker/ECR; integrated Moralis Web3 JSON-RPC API for smart contract interaction.
- Deployed ERC721 & ERC721B Solidity contracts with re-entrancy guards; tested on Rinkeby, migrated to Ethereum mainnet with verification and gas optimization.

PROJECTS & FREELANCE WORK

jeffjing.dev | React, TailwindCSS, Terraform, AWS

- Terraform-managed AWS site with CI/CD, HTTPS, and Lambda + API Gateway for dynamic recruiter features.

DevOps Infrastructure for PokerNOWAI | EKS, Terraform

- Migrated a **Vercel-hosted monolithic application** to containerized **AWS EKS** infrastructure, provisioning the environment with Terraform and implementing automated CI/CD deployments.

LancerPower — Freelance Contract | AWS, Terraform, Amplify, React

- Built and deployed a production website for a **GPU hardware vendor**, leveraging **AWS** end-to-end with Amplify CI/CD, Terraform-managed infrastructure, and Route53 DNS.

SKILLS

DevOps: Kubernetes, Helm, Grafana, Prometheus, Docker, Github Actions, Gitlab CI, Terraform, Claude, Loki

AWS: EC2, S3, Lambda, EKS, RDS, Fargate, Route53, Amplify, VPCs, IAM
